List of Identified Problem Statements

1. A student needs an easy-to-use digital platform to predict their chances of getting admission to a university of their choice.

2. Suggesting a list of recommended Colleges/Courses for a student based on their grades so that they can choose their preferred choice.

3. Providing information about Career options for a student after they complete their interested course so that they can make better decisions with long-term benefits.

4. Specifying details about available Financial Aids and Scholarships for their desired colleges/courses in order to reduce their expenses.

5. Presenting detailed, verified and up-to-date information about colleges regarding their culture, learning environment, facilities, placement records etc for student reference.
